

GETTING STARTED

Your kitchen, live in about 10 minutes

Five simple steps — no tech skills needed.

1

Create your account

Go to **thekhao.com** and tap **Get started**. Sign up with email or Google and name your kitchen — you'll get your own link, **thekhao.com/your-name**, right away.

2

Build your menu

On your dashboard, tap **Create a menu** (like "Weekend Specials"), then **Add dishes** — each with a price and an optional photo. Add as many menus as you run.

3

Set payments & pickup

In **Settings**, choose how customers pay — Cash and/or Interac e-transfer (add the email/phone they send to). Add your **pickup address** and your logo while you're there.

4

Share your link

On your dashboard, open **Your ordering link** → **Copy** it or share by text, WhatsApp or Instagram. You can also show or print the **QR code**.

5

Take orders

Every order lands on your **live dashboard** the moment it's placed. Accept it, mark it **ready**, and mark it **paid** once the money's in. That's it.

GOOD TO KNOW

Mark a dish **sold out** in one tap — it updates on every customer's screen. Order counts reset daily. Download your orders as a **report** anytime. You keep **100%** — Khao never takes a commission.
